PROFESSIONAL EXPERIENCE

Tableau, *Project Manager Intern*

Jun 2021 – Aug 2021 | Seattle

- Partnered with engineering, product, and business leadership to enhance communication across teams and stakeholders
- Managed projects, analyzed data and reported findings to executives, including the CEO, in the Programs and Operation team, who oversees the Technical Support Program (TSP)
- Exposed project needs in technically complex areas while working successfully in an Agile environment remotely during COVID-19

Companion Coding, *Co-Founder*

Apr 2018 – Jan 2021

- Led coding classes for over 40 underserved teens in the Seattle community, empowering students to pursue Computer Science
- Hosting weekly coding and youth development classes to under privileged youth in South Seattle
- Led over 50 lectures on resume building, college apps, & job application to youth, resulting in over 30+ internship offers

Microsoft, *Engineering Program Manager Intern*

Mar 2020 – Sep 2020 | Redmond

- Spearheaded front-end development on Auction PRO application for SharePoint and Shipped the new feature to 180k users to improve experience for selling products inside an organization
- Applied Agile practices including daily scrum meetings and 2-weeks sprints for iterations that were documents in Jira
- Translated business requirements to technical requirements that are ready for execution by Engineering team
- Provided hands on program management during analysis, design, development, testing, implementation/deployment, and monitoring stages

EDUCATION

Central Washington University,

B.S Computer Science

Sep 2018 – Jun 2022 | Ellensburg

Coursework: Principles of Software Development, Data Structures, Algorithm Analysis, Database Management, Principal Design

PROJECTS

CWU Restaurant App, *Group Lead & Team Design*

Oct 2021 – Mar 2022

- Created an application that made it convenient for CWU students to locate restaurants near campus
- Identified target group of 45 candidates and conducted user interviews to identify their needs, by developing key questions
- Designed UI of application using Adobe XD and Figma and completed 15 UX tests to identify improvement opportunities

Teacher Assistance Sorting Algorithm,

Developer

Nov 2021 – Feb 2022

Our senior software design capstone project was driven by students common dissatisfaction with the way the Teachers Assistance were chosen. We want to create a tool for the student to be able to have a fair and just chance of being selected for TA role based on requirements such as graduation year, courses taken and availability.
